Crimson: 16 y/o

Had an old boss (first job): Daña ← *originally doing Cosmos work*

Got an SDF contract to make & maintain Stella

3 contracts: (9mo)   #1: good back-and-forth w/ team

then waiting a   #2: team would literally ignore private msgs
month for next contract   *(bad-mouthed internally)*

He hosted everything personally.... turned off server aftr a month of non-employmnt

Daña: when doing software/Discord bots @ 13 y/o
  ↳ was in cosmos & just ~~DM'd~~ him ～

More on the Cosmos side & runs a validator ⌐

Did tax history reporter tool for accounts ^Cosmos

Elys: Finance layer on Cosmos w/ trading instruments

Daña used to work for "Siphmos" cosmos exchange
  ↖ blew up b/c bad leadership ⌣

Investors & validators came together after 4 Elys.

Main interests:
  ⌐ - LPs ^icepools all USDC-based   - leveraged liq. & perpetuals
  | ^imposs.
  | - "Smart-shielded" pools which "save IC
  | by changing pool ratios off oracles
  |_ - Dynamic weights on ~~cons~~

Eventually Daña left & now works for SDF

Pacific time: *no 6pm*   is a limit order book
